

APEX PIPING SYSTEMS, INC.

A Specialty Products Company

QUALITY POLICY/SCOPE/CONTEXT & INTERESTED PARTIES

It shall be the policy of APEX Piping Systems, Inc. to manufacture piping, modules and pressure equipment for the industrial and commercial markets, ensuring that these products meet or exceed the quality requirements of its customers. This will be accomplished by compliance to the Quality Management System, and improvement of the QMS' effectiveness through establishing, executing and reviewing quality objectives. While focusing on customer satisfaction, APEX Piping Systems, Inc. provides quality products for our customers.

APEX is committed to meeting and exceeding customers' requirements and expectations.

The scope of this Quality Management System includes the manufacture of piping, modules and pressure equipment for the industrial and commercial markets. Element 8.3 is not applicable from the scope of the system as APEX is not involved in design or development of the products it manufactures.

The context of the organization consists of fabrication in accordance with, but not limited to, customer specifications, ASME code requirements, API specifications, and any regulatory and/or statutory requirements.

The interested parties of the organization consist of, but are not limited to, shareholders, employees, regulatory and statutory bodies or representatives, customers, end users, and other stakeholders as applicable.
